

Raptor-Test Training

Deepen your Raptor knowledge with Raptor Test Training. This 1-day course is tailored for Raptor users looking to enhance their skills in using New Eagle's test automation platform. This hands-on training will teach you how to build scripts to automate the testing of Raptor applications.

Disclaimer: This is a typical agenda for this course. The time allocated to each topic is an estimate, and timings will vary from class to class as we adjust the depth of each section to meet the individual needs of the participants.

9:00AM**Introduction**

- New Eagle Background
- Raptor Platform
- New Eagle Support Portal

9:30AM**Raptor - Test Overview**

- Raptor Test: Motivations
- Raptor Test: Introduction
- Raptor Hardware Modules
- Raptor Software Modules
- *Exercise 1: Basic EV Operation*

10:50AM**Morning Break****11:00AM****Raptor - Test Fundamentals**

- Raptor Test: Getting Started
- Raptor Test: Operation Principles
- Raptor Test: Script Building
- *Exercise 2: First Script Build*

12:30PM**Lunch****1:30PM****Raptor - Test Capabilities**

- Raptor-Test: Signal Actions & Toolbox Commands
- Raptor-Test: Test Runner
- Raptor-Test: Reports
- *Exercise 3: Multiple Test Execution*

3:00PM**Afternoon Break****3:15PM****Raptor - Test Advanced Features**

- Command Line Interface
- Batch File Driven Testing
- Coordinator Module
- *Exercise 4: Test Execution from Command line*

5:00PM**Class Ends**
